DR. WILLIAM EVANS. SOOTHING SYRUP. PREPARED BY MINGELF.

To Mothers and Nurses. The passage of the teath through the ge produces troublesome and dangerous symptoms. ation in the mouth and gums during this pro cass. The guins swell, the secretion of the sal-iva is increased the child is seized with frequent and sudden fits of crying, watching, stating in sleep, and spasms of peculiar parts the child a tricks with extreme violence, and thrans its fingers into its mouth. If these precursary sympas are not speedily alleviated spasmodic convulsions universally supervene, and soon cause the dissolution of the infant. If mothers who have their little babes afilioted with these tressing symptoms would apply Dr. William Evans's Scotling Syrup, which has preserved hundreds of infacts when thought past recovery, from being suddenly attacked with that fa-

tal malady convulsions,
Tais infallible remaily has preserved han dreds when thought past recovery, from con-vulsious. As soon as the Syrup is rubbed on the guars, the child will recover. This preparation is so innocent, so efficacions, and so plea-sant, that no child will refuse to let its gums be rubbed with it. When infants are at the age of four months, though there is no appearance of teeth, one bottle of the syrup should be used on the guas to open the pores. Parents should ne-ver be without the syrup in the nursery where there are young children, for if a child wakes in the night with pain in the gams, the Syrup immediately gives ease, by opening the porc and heals the gams, thereby preventing Convul-

Washington, July 3d, 1838.

Sir—Since I have been in this city, I have ence, Doctor Hunt's System of Practice is in books. the Stomach, Lungs and the Liver, in vigerous and healthy action, as the three great fountains of health and life. For this purpose his pills are compounded of herbs, which strengthen and equalize the action of the heart, and give an impulse or strength to the arterial system, at the same time quicken the action of the absorbent all obstructions are overcome, the blood is purified, and the body assumes a heathful state. These pills give tone to the stomach, increase the appetite, and eminently expel all acid or morbid matter through the execretory ducts in-to the passage of the bowels. In all cases of Consumption, Indigestion or Dyspepsia, Bilious Affections, or Liver Complaints, Heartburn, Sourness or Acidity in the Stomath, Tightness at the Chest, Loss of Appetite, Sick Head Ache, Pain in the Head, Back, Limbs and Side, Flatulency, Typhus and Scarlet Fever, Putrid Sore Throat, Fever and Ague, or Intermitting Fevers, Gout, Rheumatism, Lumbago, Sciatica, Spasmodic Affections, and Tic Doloureux, Convulsions of Children, Measles, Small Pox, Hooping Congh. The Blood has hitherto been considered by amiricks and others, as the great regulator of be humor system, and such is the devotedness of the adherents to that erroneous doctrine, that tey content themselves with the simple pes ession of this fallacious opinion, without enquiring into the primary sousces from whence Life, Health, and vigour emanate, and vice versa, puin, sick ess, disc so a d death. Not so with DR. HUNT whose extensive research and practical experience so eminently qualify him for the profession of which he has been one of the most useful members. He contends and a moment's reflection will convince any reasonng mind of the correctness of his views-that he stomach, liver and tife associated organs are the primary and great regulators of health, and that the blood in very many instances is totally disconnected with the first and succeeding stages of disease, and that unless a medicine reaches the root of the disease, the superficial anoy-nes usually prescribed, serve but as foils to cover the ravages of deep-rooted maladies. Un der these convictions, at the expence of years of close application, the doctor has discovered a medicine whose searching powers are irresisable, and in prescribing, it is with a firm conviction of its being a radical cure in the various diseases already enumerated, even if applied in he most critical cases, but he does not pretend to asor be to

earthly remedy has failed, HUNT'S PILLS

have never been known to fail in effecting two very gratifying results, that of raising from the of sickness and thus amply rewarding Dr. Hunt for his long and noxious study to attain this perfection in the HEALING ART.

A Medicine that will perform what it promis a, is a public benefactor, such DR. HUNT'S Celebrated Pills have proved themselves to be by having been successfully tried in all parts of the country. A Medicine so compounded, that it produces a free circulation in the vessels on the surface of the body, cleanses and strengthons the Stomach, Liver, and Lungs, gives a healthy tone to all the Vicera, and by promot-ting the insensible removes all febrile or inflammatery action, and imparts muscular strength, energy, and vigerous health to the whole frame, must consequently be esteemed a pudlic beno-factor. They do not exhaust like diastic purges, still their action is more universal, and they may he often repeated, not merely with safety, but with much benefit. This becomes essential in cases of long standing, for in them temporary impressions rendered by violent nædicines, dom if ever do good, and tend to impair the
